Course Description

Who are the main actors in international politics? What are the best ways to understand international phenomena? How can knowledge of international relations theory contribute to our understanding of global issues like war, peace, economic relations, the environment, and human rights?

This course in global politics attempts to answer questions such as these by introducing students to the study of international relations (IR). The course begins with a general overview of IR as a discipline within political science. It then moves on to examine some of the core concepts in the field using the levels of analysis framework as a guide. Theories reviewed include realism, liberalism, constructivism, and those related to foreign policy decision-making. Next, we use these concepts to address issues such as the causes of war, the politics of economic relations, international organizations, the environment, and human rights.

Course Goals

Broadly speaking, the goal of this course is to provide students with the tools necessary to become *critical* and *informed* citizens when it comes to understanding global problems and foreign policy issues. In order to become more *informed*, students will learn about events in international politics, both modern and historical, as well as about contemporary perspectives on international relations from the scholarly community. *Critical* skills will be developed as students learn how to think analytically and assess arguments about international affairs, establishing a more sophisticated understanding of the political world. The course will also provide a solid base of core material for students who wish to pursue more advanced courses in international relations or foreign policy.
Course Readings

There are two required textbooks for this course. Both are available at SBX or from online retailers. Please purchase the most recent editions, identified below.

All other readings for the course will be posted on Carmen under the content tab.

In order to help guide your note-taking and reading, each week I will post a reading guide identifying key terms and questions that you should be able to answer after completing the assignment. These guides will help direct your focus and will undoubtedly be a useful study tool, but are not necessarily a comprehensive list of reading material that you might be tested on (in other words, you should read the material in its entirety even if only one or two questions are listed).

Course Requirements

Students are expected to watch every lecture, to complete all of the required readings, and to read and keep up with any materials posted to the Carmen website. Students are responsible for all of these items, and should note that class lectures will sometimes cover material that is not included in the course readings; similarly, the readings may contain material that is not covered in lectures—making both crucial to your success.

There are 5 graded components to this course. These are: (1-2) 2 exams, (3) weekly quizzes, and (4-5) two writing assignments. The exams and quizzes will test material covered in course readings, lectures, and any supplemental items (e.g. videos, podcasts, or readings) posted to the Carmen website. If supplemental items are posted, they will be explicitly identified as required, meaning that information from them might be included on exams or quizzes, or optional, meaning that interested students might simply find them helpful and/or informative. More information on each of these items is listed below.
The final grade for the course will be determined as follows:

<table>

*Extra Credit:* There will be two opportunities to earn extra credit in this course. The first is through active participation in the discussion forum, information about which is listed in the ‘Communication and Discussion’ section below. Additionally, there will be an opportunity to earn an additional 1.5% for your final grade by participating in a political science experiment. More information about this will be provided after the course begins.

*Lectures:* Video lectures and accompanying Powerpoint slides (to ease note-taking) will be posted on Carmen, under the Content tab, each week by the end of the day on Monday.

*Quizzes:* Weekly quizzes will be posted on Carmen each week on Tuesday. The quiz will remain available until midnight on Sunday. You will be allowed two attempts at each quiz, and your highest score will be recorded. Each student therefore has the freedom to watch the lecture, complete the readings, and take the quiz at any point between Tuesday and Sunday at midnight. However, no exceptions will be made for students who miss the quiz deadline—meaning that students should use their time wisely to ensure that they can complete it on time. The lowest quiz grade for the course will be dropped. The quizzes are open-book and open-notes, but are to be taken alone by the enrolled student; no collaboration between students is permitted. There is a 25 minute time restriction on each quiz – meaning that you would be wise to complete the material and ensure that you have a solid understanding of it prior to taking the quiz.

*Midterm and Final:* A midterm and a final will be administered through Carmen. They will be open-note and open-book but will be very time-restricted, limiting the student’s ability to rely on course materials. Thus, students should prepare for these exams just as they would an in-class exam. The exact times that exams will be available will be announced through Carmen.

*Writing Assignments:* During each week of the semester, I will post a discussion topic in the content section of Carmen, usually containing news items or other references for you to read. Each student will submit their written responses to 2 of these questions at some point in the semester. You will sign up for your two topics/submission weeks in the first week of the term –
by Sunday, May 12 using the Carmen discussion board. The paper should be 1-2 pages, double-spaced (12 pt Times New Roman), and should respond to the question in a thoughtful, informed manner, integrating relevant course material to demonstrate your ability to apply concepts and think analytically about international politics. In order to be graded and considered on time, the paper should be submitted to turnitin.com by Sunday at 11:59pm during the week that the material and topic were presented (for example, if you sign up to complete a paper in week 2, you will receive the topic on May 14, and the paper will be due May 19 at 11:59pm).

Communication and Discussion

I will use emails and News items on Carmen to communicate with students in the class. Please check Carmen frequently throughout the quarter, as students are responsible for reading and understanding information and announcements. If I post it to Carmen or put something in an email to the class, I expect that you have read and understood the information.

You should feel free to email me with any questions about course materials or logistics (just like you would ask questions before, during, or after a normal class meeting). Please treat your email as a professional correspondence—be as clear and specific as possible. If I feel that the question and answer would be of interest to the class, I will post it to a Discussion forum (but without pasting your email and without identifying information).

Additionally, I will hold weekly office hours using Gchat on Thursday mornings from 10am-12pm. You should feel welcome to use this as a time to ask questions, like you would using regular office hours. My gchat user name is powers.276@gmail.com. I am also available for in-person meetings by appointment – simply send me an email and we can schedule a mutually convenient time to meet in my office (2014 Derby Hall).

Finally, each week on the Discussion tab of Carmen I will post a topic for discussion. Participating in this forum is encouraged but not required. However, students who do participate consistently and constructively will be eligible for up to 2 extra credit percentage points added to their final grade at the end of the semester.

Required Statements

Academic Honesty

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term “academic misconduct” includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the
committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct (http://studentaffairs.osu.edu/resource_csc.asp). I take this issue very seriously and will submit any cases of suspected academic misconduct to the committee—if you are confused at all about what constitutes dishonest practice, please consult with me.

Disability Services

Students with disabilities that have been certified by the Office for Disability Services will be appropriately accommodated, and should inform the instructor as soon as possible of their needs. The Office for Disability Services is located in 150 Pomerene Hall, 1760 Neil Avenue; telephone 292-3307, TDD 292-0901; http://www.ods.ohio-state.edu/.

The course fulfills the following GEC requirements:

Social Science Goals:
Students understand the systematic study of human behavior and cognition; the structure of human societies, cultures, and institutions; and the processes by which individuals, groups, and societies interact, communicate, and use human, natural, and economic resources.

Organizations and Polities

Expected Learning Outcomes:
1. Students understand the theories and methods of social scientific inquiry as they apply to the study of organizations and polities.
2. Students understand the formation and durability of political, economic, and social organizing principles and their differences and similarities across contexts.
3. Students comprehend and assess the nature and values of organizations and polities and their importance in social problem solving and policy making.

Global Studies

Expected Learning Outcomes:
1. Students understand some of the political, economic, cultural, physical, social, and philosophical aspects of one or more of the world's nations, peoples and cultures outside the U.S.
2. Students recognize the role of national and international diversity in shaping their own attitudes and values as global citizens.
